

Seyed Sadiq Nezhadi

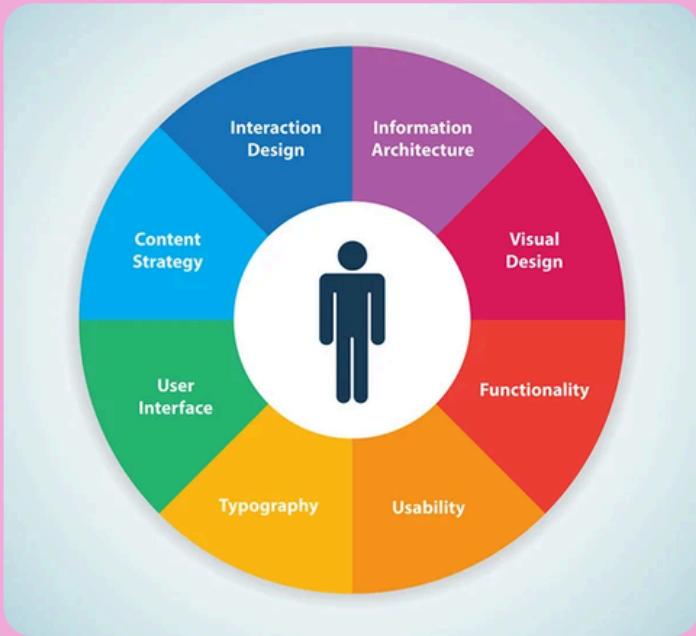

# Design Portfolio

Hi, I'm Sadiq!, I'm a creative technologist exploring how AI and design come together to create meaningful digital experiences. I've worked on projects that blend visual design, user experience, and generative tools to make ideas feel alive.

# Design focuses

## Human-Centered Design

I design experiences grounded in empathy, from researching how users interact with digital products to simplifying their journey through visual and emotional design.

## AI-Driven Creativity

I explore how generative AI tools like Stable Diffusion and ComfyUI can accelerate creativity and help designers build consistent, adaptive visuals across experiences.

## Visual Identity & Branding

From apparel to community organizations, I create cohesive brand systems that translate values into clear, memorable visual identities.

# Project gallery

## Project #1

Tools: Figma | Illustrator | Photoshop

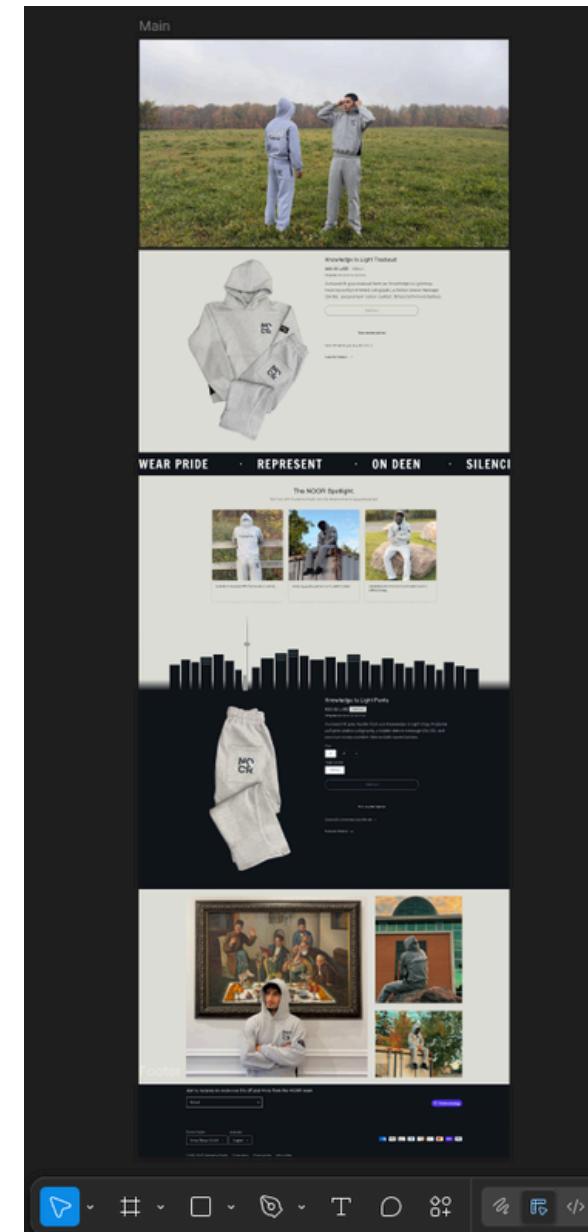

Role: Co-founder & CEO

Goal: Simplify shopping flow & maximize customer acquisition

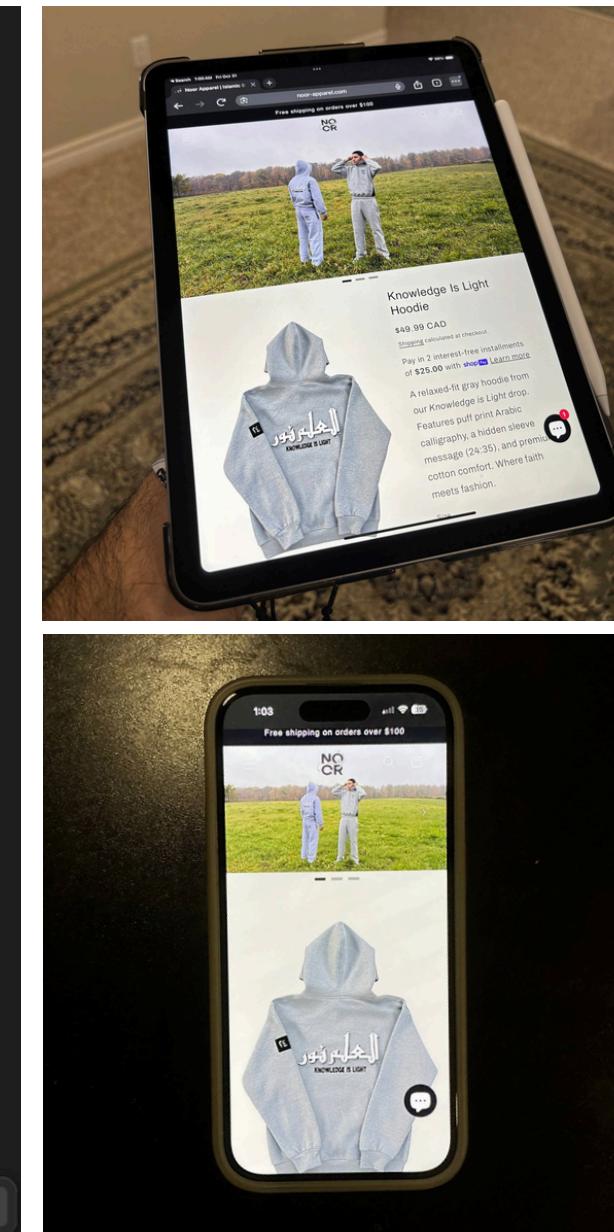

# Noor Apparel E-Commerce UX & Brand Experience

Designing a culturally expressive streetwear shopping experience for a new Islamic-inspired clothing brand. Focused on building trust, simplicity, and storytelling through a clean interface.

Figma Design

Output

Project #2

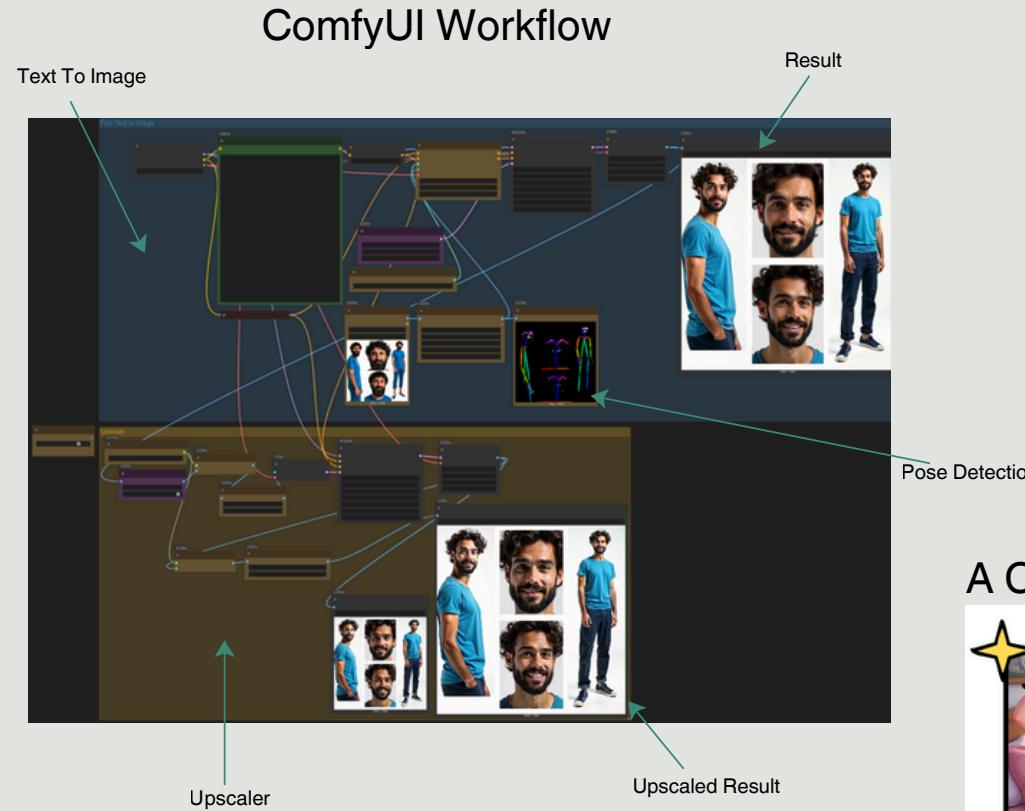

Tools: ComfyUI | KohyaSS | SD

Role: Generative AI Visual Designer

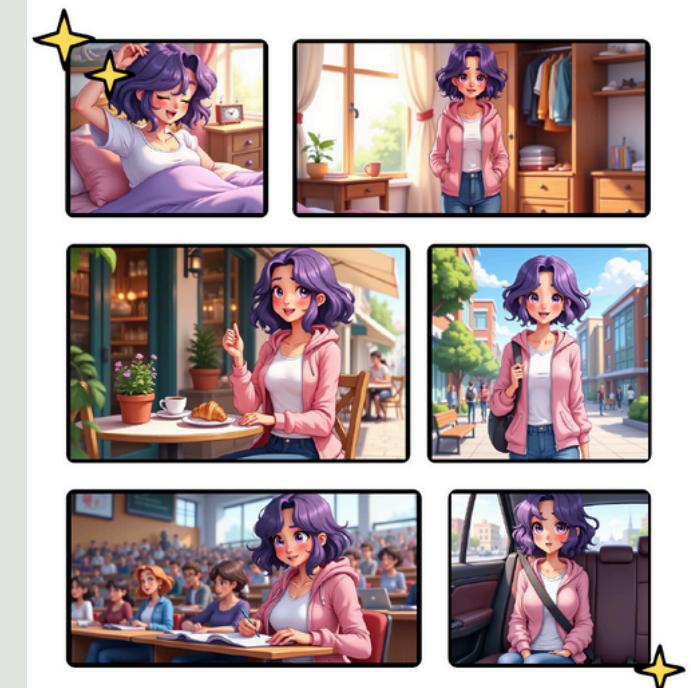

Goal: Create repeatable, consistent character systems for artists and myself

# Stable Diffusion Workflow | Designing Consistency in Generative AI

I designed modular ComfyUI workflows and trained custom LoRAs with Stable Diffusion models to create consistent character identities across scenes, poses, and lighting setups. This project explores how structured visual pipelines can combine artistic control and technical precision, turning generative AI into a reliable design tool.

A Consistent Character LoRA Made

Project #3

Tools: Illustrator | Photoshop

Role: Designer

Goal: Logos that are visually pleasing  
and relevant to the project

# Logo & Brand Design Showcase

A collection of logos and brand identities I designed for club organizations, startups, and charities.

Each project focused on translating a client's mission into a visual language.

# Let's work together!
