PRODUCT DEVELOPMENT | GENERATIVE AI | UX & VISUAL DESIGN | RESEARCH & ANALYTICS

PROFESSIONAL PROFILE

University of Toronto student and entrepreneur with experience across e-commerce, generative-AI production, product development, user research and business analysis. Co-founded a consumer apparel brand, led end-to-end AI imagery delivery for 2,500+ client products, and is developing a research-informed admissions platform.

EDUCATION

Honours Bachelor of Science | University of Toronto *Expected 2028*

Computational Cognitive Science | Computer Science Minor

PROFESSIONAL EXPERIENCE

Co-Founder & CEO | Noor Apparel *Sep 2025 – Present*

- Co-founded an apparel brand and launched its e-commerce website; direct online merchandising, product presentation, brand content and the customer shopping experience.
- Lead product launches, supplier coordination, inventory decisions, order fulfilment and customer service; resolve quality and delivery issues while balancing cost, timelines and customer expectations.
- Research competitors, pricing and online search visibility to guide positioning; organic discovery generated inquiries from groups at the University of Toronto, York University and TMU.
- Track sales, expenses, profit margins and cash flow in Excel; prepare budgets and inventory estimates to support pricing and purchasing decisions.

Generative AI Engineer Intern | GlocalSpace Ventures *Mar – Oct 2026*

- Progressed from hands-on AI image production to leading an expanding imagery team for a luxury fashion brand client; served as the primary point of contact for requirements and updates.
- Managed end-to-end delivery for 2,500+ clothing products, from initial photography through AI image generation, quality reviews, revisions and final deployment.
- Collaborated with developers to define the AI image-generation production pipeline, coordinating team handoffs, task assignments, troubleshooting and client-driven changes.
- Created and refined structured prompts and image workflows; evaluated output consistency against brand requirements and maintained reusable visual assets.

Prompt Engineering Intern | Meshkat Partners Ltd. *Apr – Aug 2025*

- Trained custom LoRA models with Stable Diffusion and ComfyUI; iterated on prompts and model settings to improve character and visual-style consistency.
- Explored interactive 3D character concepts, visual books and immersive experiences, connecting AI visual experiments with user-experience and design considerations.

PROJECTS & RESEARCH

Ontario University Admissions Platform | Team Startup | Product, UX & Research *Ongoing*

- Co-developing an AI-powered admissions advisor to make Ontario university options, requirements and application planning easier for students to navigate and compare.
- Collected 100 student survey responses on admissions pain points, information gaps and decision factors to guide feature prioritization and early experience design.
- Currently developing an interactive prototype for user testing, focused on student-friendly program discovery and clearer presentation of complex admissions information.
- Scoping a curated knowledge base of 1,500+ Ontario undergraduate program listings, including admission rules and grade information; sourcing and verification of hard-to-find figures are planned.

Visual Identity & Logo Design Portfolio | Independent & Client Projects

- Designed original logos for community groups, startups and charities, with multiple organizations adopting the finished visual identities for ongoing use.
- Developed distinctive visual concepts tailored to each organization's audience, identity and communications needs.

Residential Interior Redesign | Renovation Project

- Created realistic residential interior concepts and spatial plans; builders used the finalized designs as guidance during renovation work.

Generative Character Creation | Independent AI Project

- Built custom LoRA models and ComfyUI workflows to generate recognizable characters across different scenes and visual styles.

INDEPENDENT INVESTING & MARKET RESEARCH

Personal Investment Portfolio | Self-Directed *Ongoing*

- Manage a small portfolio using personal capital; research individual stocks, exchange-traded funds and commodities to evaluate investment ideas.
- Monitor financial news, company performance, asset-price movements and risk across investment types.
- Self-study quantitative concepts such as historical returns, basic probability and portfolio risk to inform investment reviews.

SKILLS & TOOLS

Product, Research & Leadership: Product discovery, user surveys, requirements gathering, competitor benchmarking, market research, prototyping, client communication, team leadership, quality assurance.

Design: Figma, Adobe Photoshop, Adobe Illustrator, AutoCAD, SketchUp, visual identity, logo design, UI/UX design, e-commerce experience design.

Technical & AI: Python, SQL, Java (coursework), Git/GitHub, Stable Diffusion, ComfyUI, LoRA training, prompt engineering, generative-image workflow design and testing.

Business & Analytics: Excel, budgeting, sales and expense reporting, margins, cash-flow monitoring, inventory estimates, market tracking and data organization.

CERTIFICATION

Google UX Design Professional Certificate | 2025
